1. Technology Advantage

ANTON can provide clients with integrated services in the form of technologies, equipment, personnel and management in the oil and gas development, so as to help customers reduce exploration or production costs and improve asset value.

- In 2008, Research Institute established, committed to independent R&D
- Own the national high-tech enterprise certification
- In 2006, postdoctoral workstation approved by authorities
- More than 600 patents
- 7 Tech-centers globally
- The global talent pool was established in 2014

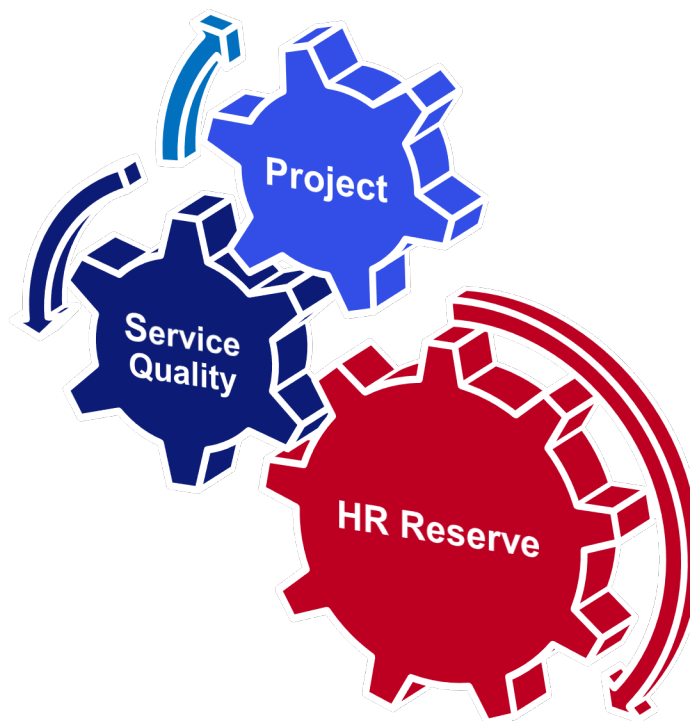

2. World Footprint

At present ANTON already has established the service base in China, Middle East, Middle Asia, Africa, South America, North America etc.

3. Human Resources

ANTON possess more than 400 human resource reserve, meanwhile we also cooperate with other supervision company that could provide competent supervisor.

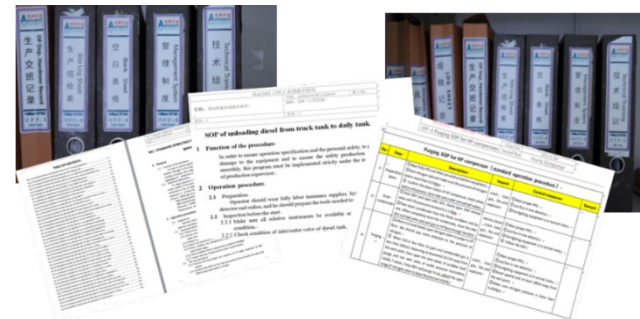

4. Management System

- With international technical service qualification and first-class management system, it has passed ISO9001, ISO14001, OHSAS18001 and API certification
- Have a relatively perfect management system and standard operating procedures.

Documents of supervision management system:

- ❑ Supervision and administration method of recruitment
- ❑ Supervision salary management
- ❑ Supervision, examination, reward and punishment
- ❑ Management Method of supervising the project bidding
- ❑ Measures for supervision and training of supervisors
- ❑ Supervisory position and capacity basic requirement
- ❑ Supervise user satisfaction evaluation and management

COMMENDATORY LETTER

FROM: Operation Dept., CNPCIC

TO: Antonoil Services DMCC Chad

Sep 7, 2018

Mr. Yin Xianghe and Mr. Mao Lingsheng,

Mr. Yin Xianghe, as the drilling operation supervisor, participate cluster wells drilling operation and the drilling performance supervising the rig inspection job of Rig58, you are sincerely diligent ensure the rig spud in in line.

Despite the large volume of workload in the Lanos oilfield drilling operation, as the RIG127 drilling supervisor, organized drilling operation and managed RIG127 team successfully. No HSSE incident happened operation.

CONGRATULATIONS to you and thanks for your diligence and effort that you would not stop and satisfy with your current level and high performance level in the future.

Best Regards,

Luo Huaidong

Operation Manager & Deputy Chief Engineer of CNPCIC

LETTER OF COMMENDATION

FROM: Operation Dept., CNPCIC

TO: Antonoil Services DMCC Chad

July 17, 2018

Mr. Qin Haibin,

During the Raphia oilfield completion, as the RIG217 day-shift supervisor, despite the large volume of workload, you not only organized and managed RIG217 team operation effectively, but also coordinated the RIG235 team operation simultaneously at the cluster-well pad Raphia S8-B6, finished 5 wells completion successfully in very timely manner and guaranteed phase 2.2 Raphia oilfield to be put into production.

From the beginning of this project until now, as a senior supervisor, you are actively helping the new supervisors, so that they can adapt their new positions as soon as possible.

CONGRATULATIONS to you and thanks for your diligence and cooperation. I hope that you would not stop and satisfy with your current level and keep improving job performance level in the future.

Best Regards,

Luo Huaidong

Operation Manager & Deputy Chief Engineer of CNPCIC

2018/7/25 N'DJAMENA CHAD

2. Praise letter of Buzurgan project

Date: May 11, 2019

To: C&W Supervision Antonoil Team

Subject: Letter of Thanks to ANTONOIL for hard work on Dual string workover well.

Dear C&W Supervision Antonoil Team:

We are writing this letter for commendatory of the excellent performance during Dual string workover well BU-12&BU-10.

On April 18, 2019, BU-10 with the fish coming out of the well, the fishing operation of the second dual string workover well was completed successfully in Missan Oil Field.

During the washover operation, due to the serious scale stuck in the well and the lack of original well data, and the packer data is missing, so the washover dual packer parameters can not be adjusted effectively, and the operation progress is slow.

By optimizing the milling tool assembly and the milling operation parameters as referring to the existing dual packer tool data, so as to overcome the difficulties. At the same scenario, two wells were miraculously fished out of the well with 9-5/8 dual packer through washover shoe. And then reasonable fishing measures were worked out, the long string below the 9-5/8" dual packer was successfully and effectively fished out. Making a new success for the downhole operation of Missan Oil Field.

Therefore, we sent the letter to extend our utmost appreciation to C&W Supervision Antonoil team and on site supervisor Huang Yao. Hope the same performance in future and continue our safe and efficient manner operations.

Yours faithfully,

DOD Manager

Solutions

1. Staff support

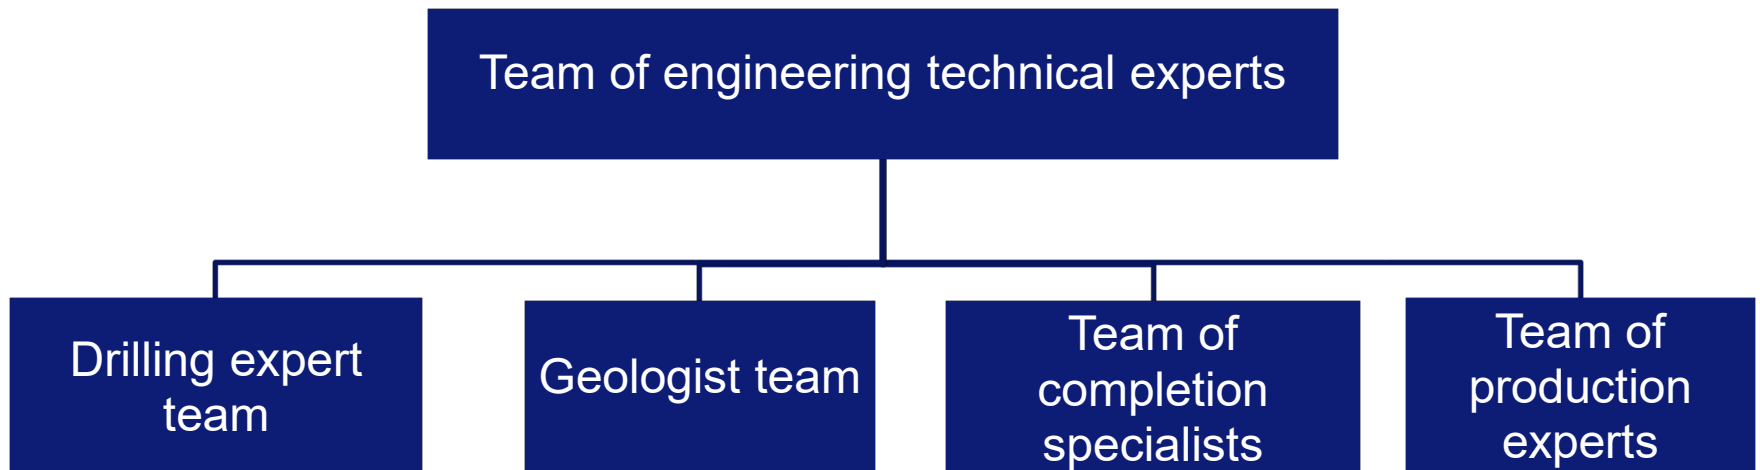

Anton has initially set up its own supervision talent team, whose specialty covers its core majors such as oil exploration and development. We can help the project in the supervision of talent, project management talent supply. Our confidence comes from the following aspects:

- China has become an important human resource market for international superintendents.
- The Anton Dubai company is also the recruitment window for international superintendents.

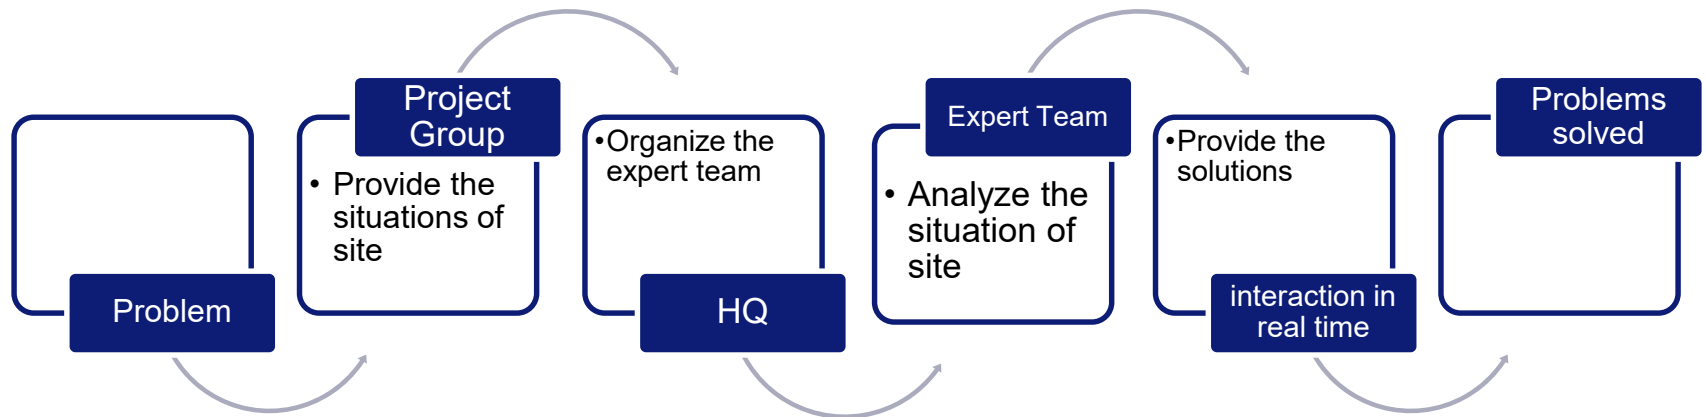

2. Team of engineering technical experts

Anton has a relatively perfect industrial layout, accumulated rich engineering and technical talents, which can form expert teams of different majors. It not only could provide supervision service support for client, but also provide expert team support for different specialties.

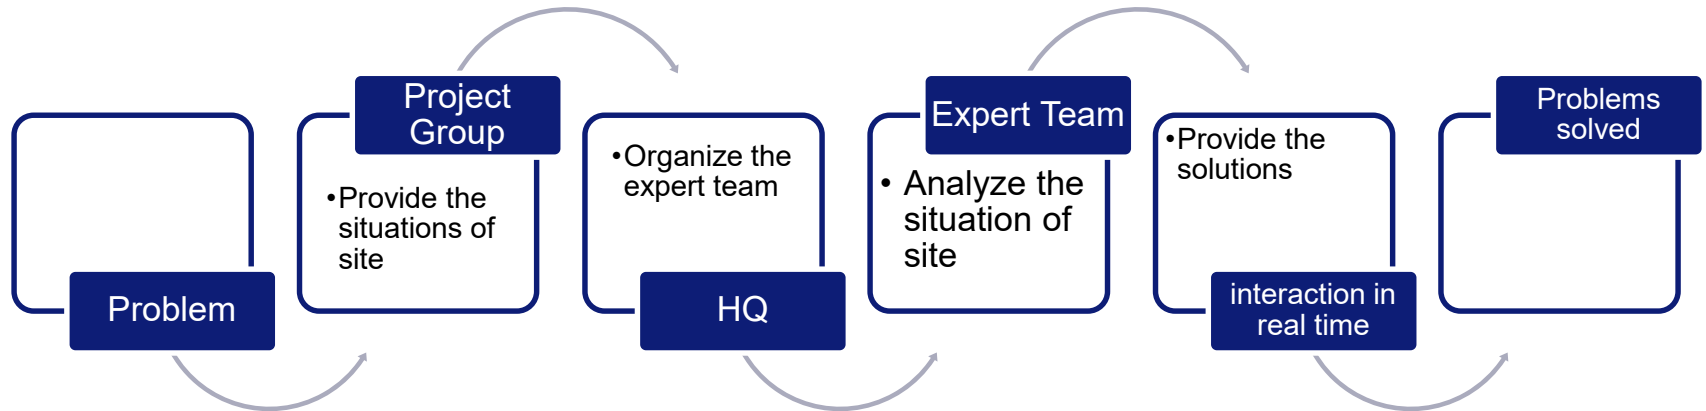

3. Disposition of emergency problems

Emergency problems could be solved by contacting Anton supervision department currently, taking advantage of Anton's team of engineering technical experts. The route map as follows:

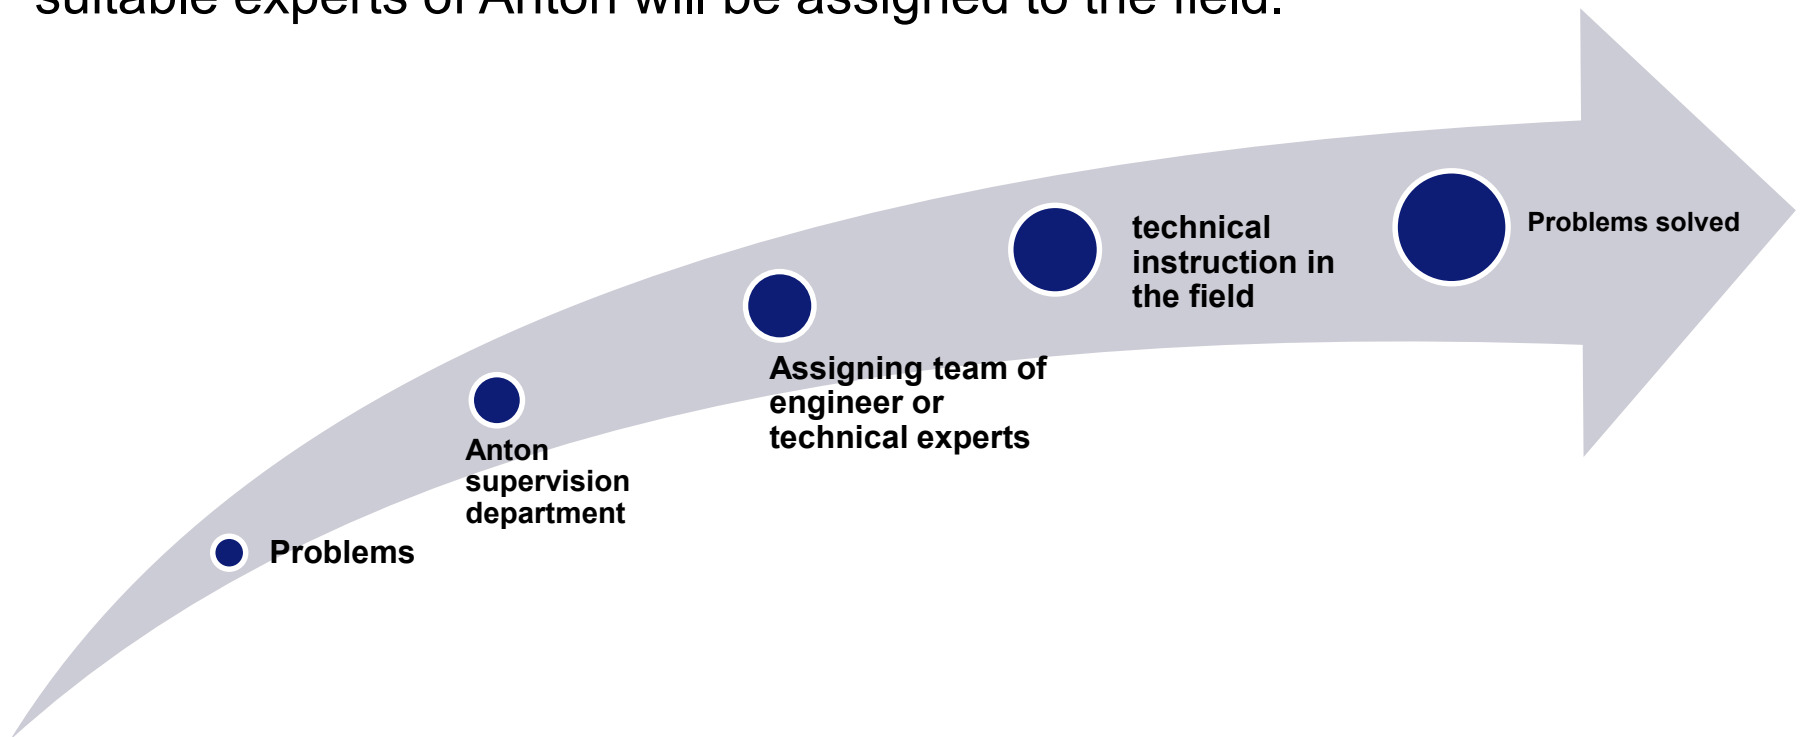

3. Disposition of emergency problems

Emergency problems could be solved by contacting Anton supervision department currently, taking advantage of Anton's team of engineering technical experts. The route map as follows:

4. Technical guidance in the field

In terms of some key problems, if needed, according to specific situation, suitable experts of Anton will be assigned to the field.

5. Service of training

Anton can organize the resources of the corresponding industry chain to carry out corresponding technical training for the client's supervision team or engineering technicians.

In addition, the company has established business cooperation with professional certification institutions, which can provide training services on well control and safety for operators.

We will adhere to Anton's "We succeed by helping others succeed....." as a direction. Adhering to the principle of maximizing the interests of customers, we are committed to providing the safest and best quality service and striving to become the "best Chinese oilfield service brand in the world".
