

Advanced Coiled Tubing Technology

Anton has global advanced coiled tubing units, comprehensive tools for CT operation and related technical solutions, which meets all kinds of demands in oil / gas exploration and production.

Scale-leading

20 CT Trailer Units more than 100 CT auxiliary equipment, professional CT service teams with more than 200 people.

Equipment-leading & Technology-leading

The most advanced equipment worldwide together with job designing and simulation software.

Provide all kinds of CT operation services, with main trend technologies: switchable sliding sleeve, abrasive perforating and fracturing, well logging and conveying, oil/gas recovery.

Achievement

Anton has served clients globally including CNPC, CNOOC, Shell, TOTAL, EOG, Lukoil, UEP, BP and Gazprom. Very good results have been maintained in various well conditions of Shale Gas, CBM, Tight oil / gas and other unconventional and conventional reservoirs

Conducted more than 5,000 wells with CT since 2009 and has set many records:

- utilization of abrasive perforating and milling plugs in the first horizontal shale gas well in China.
- Milling plug is used at 6,300 m: the deepest record in China.
- Setting a new record of milling 45 plugs in one trip.
- The first ever CT operation in Puguang Oilfield with high H₂S in China.
- The first ever CT stage frac with packer and first closable sleeve fracturing in China.
