

# Coiled Tubing Velocity String Technology for Oil / Gas Recovery

The technology is using coiled tubing as production string, achieving high efficiency of oil / gas production. Anton provides advanced production technology service and customized coiled tubing and related tools.

## Technology Features

- Continuous with high efficiency operation.
- Operate with pressure existing in CT or wellbore to prevent high cost special well killing operation.
- Providing various types of hanging based on well conditions to ensure safe and reliable operations.

## Service Range

- Suitable for all oil/gas producing wells with producing tubing.
- compatible with all kinds of hangers.
- available sizes: 1.25 in, 1.5 in, 1.75 in, 2 in, 2.375 in, 2.875 in,

## Service Performance

The technology has been successfully applied for more than 200 wells in China and overseas.
