

DRILLING TECHNOLOGY

Anton Drilling Group provides integrated drilling/completion and single technical services, and is able to cover the whole process of drilling from construction scheme design to project full life cycle organization with excellent service quality and high efficiency.

Service Scope:

- Drilling: Anton is capable of providing comprehensive drilling technology services.
- Integrated drilling and completion: Anton is competent in undertaking integrated drilling services independently, which helps clients with better cost control and performance optimization.
- As the initiator of China Drilling Union, Anton has abundant resources on various types of drilling rigs.
- Provide sidetracking and associated services, and own advanced LWD/MWD and RSS tools.
- Competent in DD, RSS and Geo-Steering drilling, windowing & sidetracking, downhole interconnecting, dual-lateral well drilling services.
- Advanced bio-synthetic base drilling fluids system, high-performance oil-based/water-based drilling fluids system.
- Elastic-plastic cementing slurry system, with rich cementing experience in gas storage, coal-bed methane (CBM) and shale gas well.

Service Performance:

With advanced equipment and excellent service capabilities, Anton Drilling Group has established good cooperative relations with Sinopec, PetroChina, Schlumberger, Baker Hughes and other major companies. Anton is committed to development in emerging markets, and has formed a wide market network covering 20 countries and regions, including China, Middle East, Africa, Central Asia, Southeast Asia and Latin America, and has formed a global service support system that can respond quickly.

- Jing Men Shale Gas Exploration Well Drilling, Completion, Fracturing & Testing Turnkey Project.
- Subei - Tight Oil Well Drilling, Completion & Fracturing Turnkey Project.
 - ◆ MD 4475m, the highest production in the same block after fracturing.
- Integrated drilling and completion turnkey project at Garraf Oilfield, Iraq.
