

IFMS Brief Introduction

1. Majnoon Field IFMS

- IFMS: Integrated Field Management Services.
- AOS take over the oilfield from July 1, 2018 and signed the Renewal IFMS Contract(2+1 year) in June 30,2021.

Majnoon Location & Brief Introduction

- Located in the south-eastern province of Basra.
- Area: 626 km².
- One of Iraq's largest oil fields with estimated oil-in-place (OIP) of 38 billion barrels.
- Discovery Date 1977.
- Production Started 2002.

Anton IFMS High Level

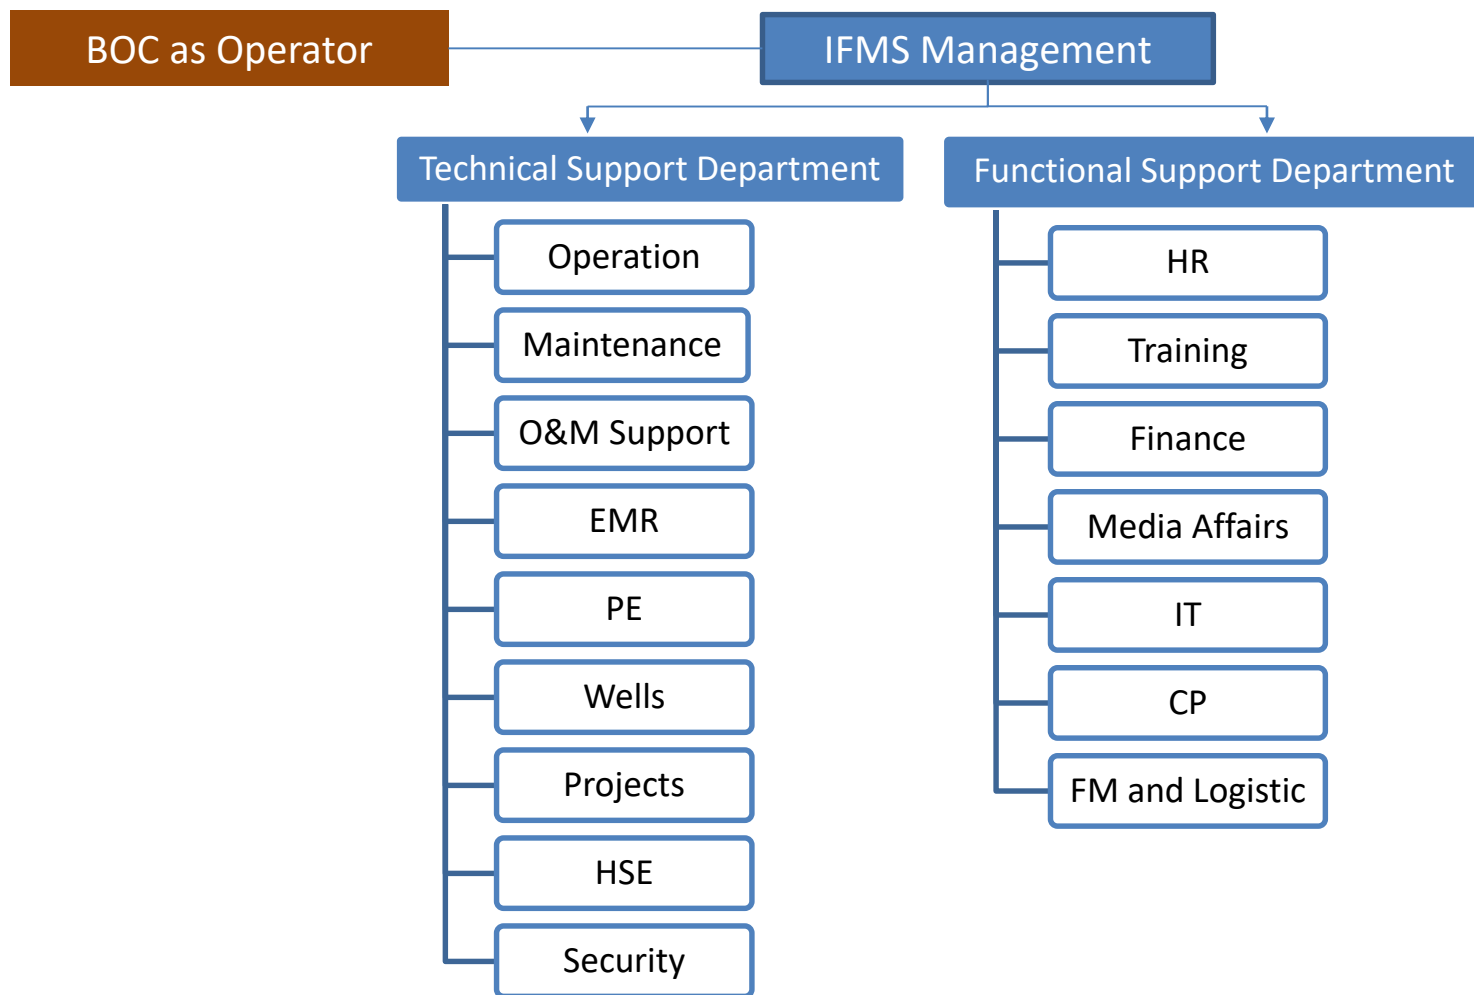

- Ensure compliance with the HSSE standards
- Maintain production levels
- Owning high-quality professional technical and international management team
- Maintain closely cooperation with BOC

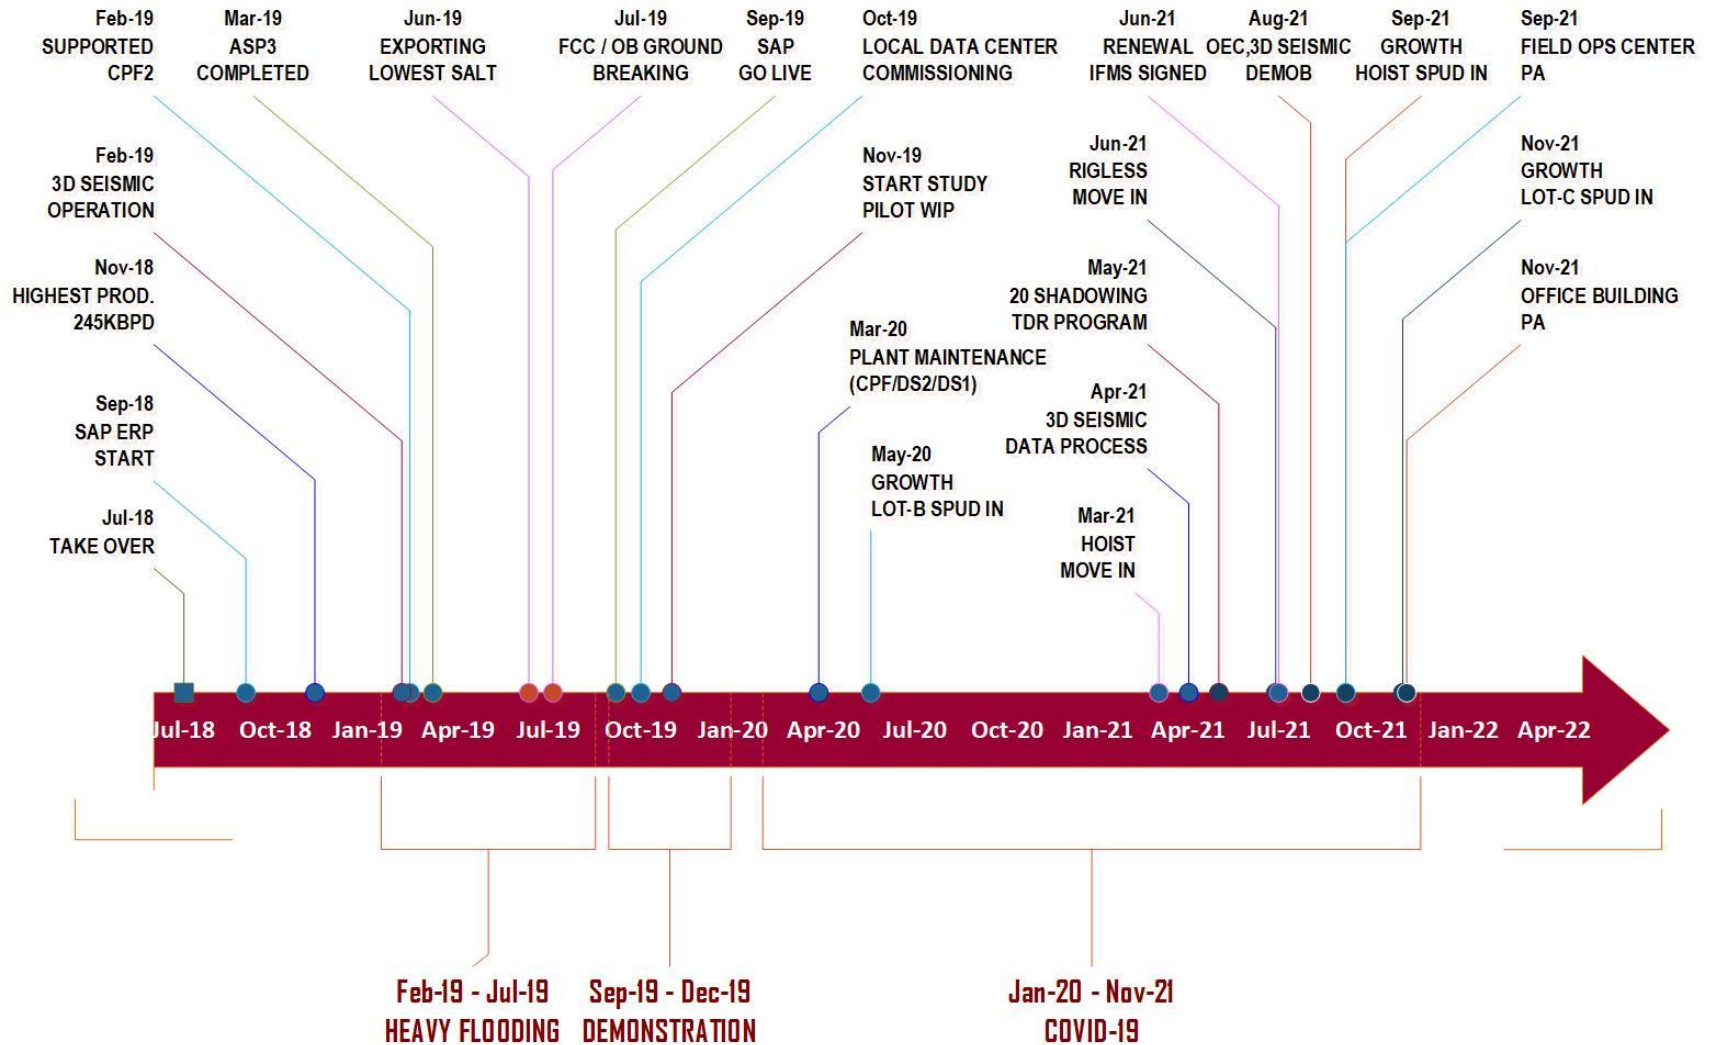

2. Scope of Work

Petroleum Engineering (& Wells)	Production Operations	General Maintenance	Special Maintenance	Comprehensive Management & Services	
Modelling Forecasting	Lab. Services & Prod. Chemistry	Planning / Scheduling	Metering / Calibration	Health, Safety, Security & Environment Management	Life Support, Facilities & Waste Mgt.
Subsurface Support to Drilling	Control System	ME&I PM/CM Execution	Cathodic Protection		
WRFM	Operations Support	Shutdown & Turnaround	Corrosion Maintenance	Centralized Procurement, Expediting, FF & E2E Materials Management	
Production Support & HC Allocation	Production Support	Reliability& Inspection	Workshop Services	Contracting, Sub-Contractor Management and In & To Field Logistics	
Water Injection	Planning	Minor Projects	OEM Support	Functional Support, Local Content & Novated Contracts Management	
Seismic	Coordination	Condition Monitoring	Industrial Cleaning	Information Technology, Information & Risk Management, Telecommunication	
Full Field Development	Execution Workforce	Lifting & Hoisting	HVAC & ATIC	Planning & Budgeting, Internal Control Audit & Assurance Services	
Integrated Growth Wells & Flow lines Delivery: Drilling, CWI, Well Pads, LLIs	Supervision	MOC & MAIN Readiness Assurance	Analysis & Inspection	Non-hydrocarbon and Greenfield Infrastructure	
	Turnaround	Power Generation & Distribution Facilities Engineering, Debottlenecking / Optimization / Upgrades			
Subsurface Data Management
